## **Concrete And Culture A Material History:**

*Concrete and Culture* Adrian Forty, 2013-02-15 Concrete has been used in arches vaults and domes dating as far back as the Roman Empire Today it is everywhere in our roads bridges sidewalks walls and architecture For each person on the planet nearly three tons of concrete are produced every year Used almost universally in modern construction concrete has become a polarizing material that provokes intense loathing in some and fervent passion in others Focusing on concrete's effects on culture rather than its technical properties *Concrete and Culture* examines the ways concrete has changed our understanding of nature of time and even of material Adrian Forty concentrates not only on architects responses to concrete but also takes into account the role concrete has played in politics literature cinema labor relations and arguments about sustainability Covering Europe North and South America and the Far East Forty examines the degree that concrete has been responsible for modernist uniformity and the debates engendered by it The first book to reflect on the global consequences of concrete *Concrete and Culture* offers a new way to look at our environment over the past century

Stuff Matters Mark Miodownik, 2014 An eye opening adventure deep inside the everyday materials that surround us from concrete and steel to denim and chocolate packed with surprising stories and fascinating science

## **Strategic Sustainability**

Daniel Fogel, 2016-03-22 *Strategic Sustainability* examines how organizations can implement environmental sustainability science theories and ways of thinking to become more competitive Including examples and ideas implemented in various countries it is based on known scientific principles about the natural world and organizational principles focusing on the work domain The intersection of these two realms of research creates a powerful and new approach to comprehensive seemingly contradictory issues Daniel S Fogel draws from disparate fields and creates a story about organizations their future and how people are part of the problem and more importantly part of the solution Readers will find ways to take action to improve organizations and avoid denigrating our natural environment learning to be mindful of the urgency we should feel to improve our impact on the world The focus on the natural environment provides a powerful focus for creating value in organizations and addressing the major challenges we all face Advanced sustainability students working professionals and board members managers and legislators responsible for governing organizations or implementing public policy will find this book useful A companion website features an instructor's manual with test questions as well as 38 10 minute videos for classroom use

History Museums in the United States Warren Leon, Roy Rosenzweig, 1989 Every year 100 million visitors tour historic houses and re-created villages examine museum artifacts and walk through battlefields But what do they learn What version of the past are history museums offering to the public And how well do these institutions reflect the latest historical scholarship Fifteen scholars and museum staff members here provide the first critical assessment of American history museums a vital arena for shaping popular historical consciousness They consider the form and content of exhibits ranging from Gettysburg to Disney World They also examine the social and political contexts on which museums operate

Naveh,1992-06 A provocative treatment of political martyrdom in the United States a well crafted thought provoking book The Lincoln Herald In the U S dead politicians and controversial reformers have frequently been called martyrs to a cause But achieving martyrdom is more elusive than simply being jailed murdered or rejected in fighting for what one believes This is the thrust of Naveh s argument which traces the martyr motif in American political culture since the 1830s Choice Drawing upon eulogies and obituaries sermons and biographies poems and public memorials Crown of Thorns is most valuable in providing a taxonomy that helps suggest why some public figures sink into oblivion while a very few others belong to the ages The Journal of American History Naveh makes admirable use of a wide range of primary sources particularly those drawn from popular rather than elite culture well written Crown of Thorns should be of some interest to all who are interested in the dynamics of cultural inertia and social change in the United States History    **Historical Outlook** ,1921    Fundamental Questions in Cross-Cultural Psychology Fons J. R. van de Vijver,Athanasiос Chasiotis,Seger M. Breugelmans,2011-03-17 Cross cultural psychology has come of age as a scientific discipline but how has it developed The field has moved from exploratory studies in which researchers were mainly interested in finding differences in psychological functioning without any clear expectation to detailed hypothesis tests of theories of cross cultural differences This book takes stock of the large number of empirical studies conducted over the last decades to evaluate the current state of the field Specialists from various domains provide an overview of their area linking it to the fundamental questions of cross cultural psychology such as how individuals and their cultures are linked how the link evolves during development and what the methodological challenges of the field are This book will appeal to academic researchers and post graduates interested in cross cultural research    *The Dialectics of Praxis and Theoria in African Philosophy* B. Bin-Kapela,2011-09-26 This book is a clarion call for African renaissance informed by African spirituality It develops the vision that Africans can be the same in the process of change Africans have to coincide with their ways of perceiving values and to retrieve their identity wiped out by regrettable historical events Even in this involvement of revalorisation of their stifled ways Africans have to be aware of the fact that history has evolved and new human

environments are taking place Any attempt to recover African personality involves a triple necessity First to remember the past second to analyse critically what Africans have inherited from their past and lastly to project new ways and means for a genuine renaissance free from alienation and exploitation Bin Kapela sees in Cultural hermeneutics an appropriate philosophical method to achieve this end of recognising and projecting African spirituality as a universal value The History and Prospects of the Social Sciences Harry Elmer Barnes,1925 A History of Kansas Anna Estelle Arnold,1914
