Science of Computational Intelligence ,1999 **Economic Modeling Using Artificial Intelligence Methods** Tshilidzi Marwala,2013-04-02 Economic Modeling Using Artificial Intelligence Methods examines the application of artificial

intelligence methods to model economic data Traditionally economic modeling has been modeled in the linear domain where the principles of superposition are valid The application of artificial intelligence for economic modeling allows for a flexible multi order non linear modeling In addition game theory has largely been applied in economic modeling However the inherent limitation of game theory when dealing with many player games encourages the use of multi agent systems for

modeling economic phenomena The artificial intelligence techniques used to model economic data include multi layer perceptron neural networks radial basis functions support vector machines rough sets genetic algorithm particle swarm optimization simulated annealing multi agent system incremental learning fuzzy networks Signal processing techniques are explored to analyze economic data and these techniques are the time domain methods time frequency domain methods and fractals dimension approaches Interesting economic problems such as causality versus correlation simulating the stock market modeling and controlling inflation option pricing modeling economic growth as well as portfolio optimization are examined The relationship between economic dependency and interstate conflict is explored and knowledge on how economics is useful to foster peace and vice versa is investigated Economic Modeling Using Artificial Intelligence Methods deals with the issue of causality in the non linear domain and applies the automatic relevance determination the evidence framework Bayesian approach and Granger causality to understand causality and correlation Economic Modeling Using Artificial Intelligence Methods makes an important contribution to the area of econometrics and is a valuable source of reference for graduate students researchers and financial practitioners
