## **Converting Storefronts To Housing An Illustrated Guide:**

**Converting Storefronts to Housing** City of Chicago, 1997-07-01 Virtually every city faces the problem of vacant storefronts that discourage neighborhood reinvestment. This valuable how-to guide provides ideas and design solutions for converting surplus commercial storefront space to residential uses. It identifies five common types of commercial buildings, discusses the pros and cons of converting each type to housing, and examines issues such as privacy, security, zoning and historic preservation. Rich with photos, this report also includes sample drawings that guide you through the reinvention of the building's interior space. Before and after photos provide dramatic proof that these ideas can be highly successful in improving communities, providing housing and preserving the best of the past. Includes five well-illustrated case studies.

**Converting Storefronts to Housing**, 1997    **Urban Research Monitor**, 1998    *Urban Land*, 1997    Regulating Home-based Businesses in the Twenty-first Century Charles Wunder, 2000 Technological advances, particularly the ubiquitous home computer, make it imperative to re-examine and update antiquated zoning provisions that limit or prohibit work at home. Charles Wunder examines both the content and impact of existing regulations and finds most of them to be neither sensible, useful nor enforceable. He suggests a new framework for organizing home-based business regulations and an attitude toward implementation and enforcement that encourages entrepreneurship, creativity and individual expression while still protecting neighborhood residential character.    *Parks and Economic Development* John L. Crompton, 2001 Parks and open space are not just beautiful; they are economically beneficial, too. But parks advocates and planners must be able to demonstrate that open spaces and recreational areas contribute to the community's economic vitality before local officials will lend their support. Securing and keeping political and financial support often requires repositioning a proposed project or facility in the minds of elected officials and other decision makers. This report explains how to measure and report the positive economic impact of parks and open space on the financial health of local businesses and government. Impact studies, graphs, charts and other aids included in the report show how these contributions more than compensate for local tax dollars spent on acquiring, upgrading and maintaining parks and other outdoor recreational areas. For example, parks planners can use a variety of economic impact measures, including sales, personal income and employment, to show the positive economic effect on a community of visitors to parks and related attractions. Repositioning is a difficult long-term process that requires changing entrenched public and bureaucratic attitudes and practices. Nonetheless, repositioning parks issues, aligning them with local economic development efforts, is both necessary and feasible. Once linked politically and psychologically with economic vitality and development, parks and open space projects are far more likely to find favor and sustained support from both elected officials and the general public. The report describes three different strategies that parks planners and agencies may use alone or in combination to reposition parks issues. This report is sponsored in part by the Wallace Reader's Digest Funds, the Doris Duke Charitable Foundation and the American Planning Association's City Parks Forum. It is the second in a

series of three reports by the City Parks Forum The first report is Parks Recreation and Open Space PAS 497 498 by Alexander Garvin "Everything You Always Wanted to Know about Regulating Sex Businesses" Eric D. Kelly,Connie B. Cooper,2000 Sex is big business and the Internet is making it bigger This report is a practical guide to the regulation of lawful sex business and businesses handling significant quantities of sexually oriented materials Such business include adult cabarets and other establishments with sexually oriented live entertainment adult movie theaters adult book stores adult video stores sex shops peep shows often call video arcades mainstream video stores with back rooms with sexually oriented material newstands with back rooms of sexually oriented materials and more The report examines what constitutes a lawful sex business First Amendment issues related to the regulation of sexually oriented businesses land use issues and adult uses and operating issues related to sex businesses Finally the report suggests ways to structure an effective regulatory program providing a checklist so that local communities can build an ordinance to suit their particular circumstances *Report ,1978*

New Uses for Obsolete Buildings Jo Allen Gause,Bruce M. Hoch,John D. Macomber,Jonathan F. P. Rose,1996 *Parking Standards* Michael Davidson,Fay Dolnick,2002 This new report an expanded and updated version of a previous best seller contains not only an exhaustive set of parking standards but also a section dealing with the complexities of creating practical parking standards in the present day U S For instance there is general agreement in recent planning literature that when the supply of parking greatly exceeds typical demand the results are detrimental to a range of stakeholders However while benefits may accrue from minimizing the amount of off street parking downsizing parking requirements may be a tricky proposition because many communities fear detrimental impact on overall community development objectives The commentary in this report addresses that quandary as well as techniques such as shared parking maximum parking standards downtown parking standards and more **Jobs-housing Balance** Jerry Weitz,2003 Jobs Housing Balance examines a controversial concept Some have argued that the market is the mechanism that will achieve balance between jobs and housing Weitz in his research of four types of jobs housing imbalance concludes that in fact the market has failed to achieve balance in three of the four jobs housing balance scenarios he lays out He provides a number of case studies to support his findings including one from King County Washington showing that increases in housing costs are more gradual in areas with a jobs housing balance This report counters the skeptics and points to those actions planners can take to help bring appropriate housing jobs and workforces together resulting in overall community improvements *Incentive Zoning* Marya Morris,2000 Incentive zoning has received renewed attention as communities implement smart growth principles into planning and development processes Incentive zoning allows a developer to build a larger higher density project than would be permitted under existing zoning In exchange the developer provides something that is in the community's interest that would not otherwise be required e g open space plazas arcades etc The common types of community benefits or amenities for which state and local governments have devised incentive programs are urban design human services including affordable

housing and transit access This report provides historical perspective summarizes state enabling legislation and describes the key substantive and legal issues local governments must address in crafting such regulations Case studies from Arlington County Virginia Minneapolis and Seattle demonstrate how incentives can be used to achieve smart growth objectives The report also provides principles to guide model legislation for zoning and affordable housing incentives **Smart Growth Audits** Jerry Weitz,Leora Susan Waldner,2002 A look at how a local government can examine the genetic codes of its planning the regulations and plans that govern development to determine whether those codes are programmed to facilitate sprawl or smart growth This report describes the concept of a smart growth audit and provides methods to implement one in your community Examples from a state Illinois regions in Indiana the Puget Sound are and metropolitan Atlanta are included but the focus is on how to do an audit at the local level using case studies of the audits in Charlotte Mecklenburg County and Durham North Carolina and Brookings Oregon A range of possible audits are described from a very basic audit to a very comprehensive audit for which a checklist is included **Telecom Hotels** Jennifer Evans-Cowley,2002 Do you know what a telecom hotel is Beginning in 1999 they began showing up in the downtowns of many American cities And most of these cities had never seen this type of use before Many had to draft emergency legislation to prevent these new developments from disrupting downtown plans This report provides a review of existing regulations as well as a model ordinance for telecom hotel development so that your city can be prepared You will find the definitions standards and innovative ideas employed by cities from Sacramento to Cleveland Given the expected explosion of high speed Internet connections in the next few years especially for residential users telecom hotels are likely to become more prevalent And the need to disperse these high tech facilities for security and back up purposes is likely to mean the siting of telecom hotels in suburbs and areas within metropolitan regions where they might not have sited before Remember what happened with cell towers get your plan and regulations in order before the permit applications start to flow **Transportation Impact Fees and Excise Taxes** Connie B. Cooper,2000 As part of an arterial street impact fee study conducted for Kansas City Missouri the author surveyed 25 jurisdictions across the United States to gather information about how those jurisdictions were financing arterial street improvements generated by new development
