Microhistories of Technology Mikael

Hård, 2023-02-20 In this open access book Mikael Hård tells a story of how people around the world challenged the production techniques and products brought by globalization. Retaining their autonomy and freedom creative individuals selectively adopted or rejected modern gadgets tools and machines. In standard historical narratives globalization is portrayed as an unstoppable force that flattens all obstacles in its path. Modern technology is also seen as inexorable in the nineteenth century steamships telegraph lines and Gatling guns are said to have paved the way for colonialism and other forms of dominating people and societies. Later shipping containers and computer networks purportedly pulled the planet deeper into a maelstrom of capitalism. Hård discusses instances that push back against these narratives. For example in Soviet times inhabitants of Samarkand Uzbekistan preferred to remain in and expand their own mud brick houses rather than move into prefabricated concrete residential buildings. Similarly nineteenth century Sumatran carpenters ignored the saws brought to them by missionaries and chose to chop down trees with their arch bladed adzes. And people in colonial India successfully competed with capitalist run Caribbean sugar plantations continuing to produce their own muscovado and sell it to local consumers. This book invites readers to view the history of technology and material culture through the lens of diversity. Based on research funded by the European Research Council and conducted in the Global South Microhistories of Technology Making the World shows that the spread of modern technologies did not erase artisanal production methods and traditional tools.

Food, Culture and Identity in the Neolithic and Early Bronze Age Michael Parker Pearson, 2003

Archaeology literally feeds on the residues and discarded remains of our ancestors meals. Such material has spawned a vast field of research and scientific techniques looking at prehistoric diet and food so that we can now learn more about the residues found stuck to the bottom of a Bronze Age pot than what is at the bottom of our own freezers.
