**The Science of Science Fiction** Matthew Brenden Wood, 2017-02-20 Early science

fiction imagined a world with space travel video calls and worldwide access to information things we now know as NASA's human spaceflight program Skype and the Internet. What next? Could we really bring back the dinosaurs travel to a distant star or live on Mars? In *The Science of Science Fiction* readers ages 12 to 15 explore the science behind classic and modern science fiction stories including artificial intelligence, androids and the search for alien life. They learn how cutting edge concepts including time dilation and genetic manipulation influence today's fiction. *The Science of Science Fiction* promotes critical thinking skills through inquiry, discovery, research, analysis and reflection of key scientific ideas and concepts made popular by many titles in science fiction. Each chapter features informative sidebars and video and website links for an in-depth look at key topics. Science minded experiments include a simple demonstration of artificial gravity using a bucket of water and calculating the speed of light using chocolate in a microwave. This variety of resources ensures the material is accessible to students with diverse learning styles.

**Gender and Care with Young Children** B. Denise Hodgins, 2019-04-08 This book is an exploration of how children, educators and things become implicated in gendered caring practices. Drawing on a collaborative research study with early childhood educators and young children, the author examines what an engagement with human and non-human relationality does to complicate conversations about gender and care. By employing a feminist material analysis of early childhood education, this book rethinks dominant Euro-Western individualist pedagogies in order to reposition them within a relationality framework. The analysis illuminates the political and ethical embeddedness of early childhood education and the understanding that gendering and caring emerge with in a complex web of many relations.

**Research and Teaching in a Pandemic World** Basil Cahusac, de Caux, Lynette Pretorius, Luke Macaulay, 2023-01-01 This book adopts collaborative autoethnography as its methodology and presents the collective witnessing of experiences of the COVID 19 pandemic within the higher education sector. Through the presentation of staff and student experiences and what was learnt from them, the authors examine the global phenomenon that is the COVID 19 pandemic through the purposeful exploration of their own experiences. This book presents an overall argument about the state of higher education in the middle of the pandemic and highlights academic issues and region specific challenges. The reflections presented in this book offer insights for other staff and students as well as academic policy makers regarding the pandemic experiences of those within academia. It also offers practical suggestions as to how we as a global community can move forward post pandemic.
