Computer Story Tools Of Communication

Kevin Ryan, James Michael Cooper

Computer Story Tools Of Communication:

Technological Tools for the Literacy Classroom Whittingham, Jeff, Huffman, Stephanie, Rickman, Wendy, Wiedmaier, Cheryl, 2013-04-30 This book combines practical and effective classroom practices with the latest technological research findings utilized in literacy instruction Provided by publisher

Cognitive Technology: Instruments of Mind Meurig Beynon, Christopher L. Nehaniv, Kerstin Dautenhahn, 2003-05-15 Cognitive Technology Instruments of Mind Cognitive Technology is the study of the impact of technology on human cognition the externalization of technology from the human mind and the pragmatics of tools It promotes the view that human beings should develop methods to predict analyse and optimize aspects of human tool relationship in a manner that respects human wholeness In particular the development of new tools such as virtual environments new computer devices and software tools has been too little concerned with the impacts these technologies will have on human cognitive and social capacities Our tools change what we are and how we relate to the world around us They need to be developed in a manner that both extends human capabilities while ensuring an appropriate cognitive fit between organism and instrument The principal theme of the CT 2001 conference and volume is declared in its title Instruments of Mind Cognitive Technology is concerned with the interaction between two worlds that of the mind and that of the machine In science and engineering this interaction is often explored by posing the question how can technology be best tailored to human cognition But as the history of technological developments has consistently shown cognition is also fashioned by technology Technologies as diverse as writing electricity generation and the silicon chip all illustrate the profound and dynamic impact of technology upon ourselves and our conceptions of the world
