- A crate filled with delicious junk food rests on a horizontal floor. Only gravity and the support force of the floor act on it, as shown by the vectors for weight W and normal force n .
 - The net force on the crate is (zero) (greater than zero).
 - Evidence for this is no acceleration.
- A slight pull P is exerted on the crate, not enough to move it.
 - The force of friction f acting on the crate is (less than) (equal to) (greater than) P .
 - The net force on the crate is (zero) (greater than zero).
- Pull P is increased until the crate begins to move. It is pulled so that it moves with constant velocity across the floor.
 - Friction f is (less than) (equal to) (greater than) P .
 - Constant velocity means acceleration is (zero) (greater than zero).
 - The net force on the crate is (less than) (equal to) (greater than) zero.
- Pull P is further increased and is now greater than friction f .
 - The net force on the crate is (less than) (equal to) (greater than) zero.
 - The net force acts toward the right, so acceleration acts toward the (left) (right).
- If the pulling force P is 150 N and the crate doesn't move, what is the magnitude of f ? 150 N
- If the pulling force P is 200 N and the crate doesn't move, what is the magnitude of f ? 200 N
- If the force of sliding friction is 250 N, what force is necessary to keep the crate sliding at constant velocity? 250 N
- If the mass of the crate is 50 kg and sliding friction is 250 N, what is the acceleration of the crate when the pulling force is 250 N? 0 m/s² 300 N 1 m/s² 500 N 5 m/s²

Part one describes six kinds of problems and the methods required to solve them. Part two goes beyond traditional discussions of case design and introduces six different purposes or functions of cases the building blocks of problem solving learning environments. It also describes methods for constructing cases to support problem solving. Part three introduces a number of cognitive skills required for studying cases and solving problems. Finally Part four describes several methods for assessing problem solving. Key features includes Teaching Focus. The book is not merely a review of research. It also provides specific research based advice on how to design problem solving learning environments. Illustrative Cases A rich array of cases illustrates how to build problem solving learning environments. Part two introduces six different functions of cases and also describes the parameters of a case. Chapter Integration Key theories and concepts are addressed across chapters and links to other chapters are made explicit. The idea is to show how different kinds of problems cases skills and assessments are integrated.
