Conducting Scientifically Crafted Child Custody Evaluations:

Conducting Scientifically Crafted Child Custody Evaluations Jonathan W. Gould, 1998-05-20 In Conducting Scientifically Crafted Child Custody Evaluations author Jonathan W Gould compiles the literature on child custody evaluation into a coherent logically integrated format that can be applied directly to practice. This empirically based book represents state of the art forensic techniques in the rapidly changing field of child custody evaluation. Gould challenges this dynamic field to further advance by enhancing its level of professionalism and strengthening its scientific basis. Currently only 10% of divorcing couples with children pursue resolution of custody disputes. The author questions whether this minority comprises a unique population that requires separate uniquely developed intervention protocols. He asks If the people who request forensic child custody evaluation comprise a unique population how useful are our assessment tools when they have not been validated on this distinctive group. Proposing new assessment models that are in fact based on studies with this population Gould emphasizes that this is one of the fastest growing areas of professional involvement for practicing psychologists, counselors and social workers. Divided into three parts the book covers a conceptual framework the evaluation process and suggestions for the evaluator in preparing for court. This book targets psychologists, social workers and students in the fields of family social work, family psychology, family counseling, forensic psychology, family studies and family law. A

Morewitz, Mark L. Goldstein, 2013-08-20. The role of behavioral and social sciences in the courtroom setting has expanded exponentially in the past few decades. It is now widely recognized that scientists in these areas provide critical contextual information for legal decision making and that there is a reliable knowledge base for doing so. While there are many handbooks of forensic psychology, this is the first such volume to incorporate sociological findings broadening the conceptual basis for examining cases in both the civil and criminal realms including immigration issues, personal injury, child custody, and sexual harassment. This volume will examine the responsibilities of expert witnesses and consultants and how they may utilize principles, theories, and methods from both sociology and psychology. It will show how these disciplines together can improve the identification and apprehension of criminals as well as enhance the administration of justice by clarifying profiles of criminal behavior, particularly in cases of serial killers, death threat makers, stalkers, and kidnappers. The volume is quite comprehensive, covering a range of medical, school, environmental, and business settings. Throughout, it links basic ideas to real applications and their impact on the justice system.
