seem to be pertinent to the principals decisions to teach nor to their ability to carry off the additional responsibilities of teaching The study contributes to an understanding of a position the teaching principalship long thought obsolete or unfeasible in the complexity of modern schools first by demonstrating that this role is viable in secondary schools and second by illustrating the functions of the role in school settings Further study might develop a broader profile of the status of teaching principals in American schools and seek additional lessons from other fields in which leaders are also practitioners
