Custom Guide Powerpoint 2015 Training

Custom Guide Powerpoint 2015 Training:

A National Trauma Care System National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on the Health of Select Populations, Board on Health Sciences Policy, Committee on Military Trauma Care's Learning Health System and Its Translation to the Civilian Sector, 2016-09-12 Advances in trauma care have accelerated over the past decade spurred by the significant burden of injury from the wars in Afghanistan and Iraq. Between 2005 and 2013 the case fatality rate for United States service members injured in Afghanistan decreased by nearly 50 percent despite an increase in the severity of injury among U.S. troops during the same period of time. But as the war in Afghanistan ends knowledge and advances in trauma care developed by the Department of Defense DoD over the past decade from experiences in Afghanistan and Iraq may be lost. This would have implications for the quality of trauma care both within the DoD and in the civilian setting where adoption of military advances in trauma care has become increasingly common and necessary to improve the response to multiple civilian casualty events. Intentional steps to codify and harvest the lessons learned within the military's trauma system are needed to ensure a ready military medical force for future combat and to prevent death from survivable injuries in both military and civilian systems. This will require partnership across military and civilian sectors and a sustained commitment from trauma system leaders at all levels to assure that the necessary knowledge and tools are not lost. A National Trauma Care System defines the components of a learning health system necessary to enable continued improvement in trauma care in both the civilian and the military sectors. This report provides recommendations to ensure that lessons learned over the past decade from the military's experiences in Afghanistan and Iraq are sustained and built upon for future combat operations and translated into the U.S. civilian system.

The Art and Science of Training Elaine Biech, 2016-12-01 There are more similarities than differences between how artists and scientists work. Both ask countless questions. Both search in earnest for answers. Both are dedicated to reaching the best results. Not so different from today's trainers are they? Elaine Biech, one of the most highly regarded names in talent development, has set out to identify the perfect blend of content mastery and audience insight. The result is this highly informative book. *The Art and Science of Training* presents the science for learning and development but it also emphasizes that training success lies in knowing what to do when things don't go as planned. Discover how top facilitators always put learners first, even when faced with exceptions to the rule: the unwilling learner, the uninformed supervisor, the inappropriate delivery medium, or the unmanageable performance challenge. And learn why you must understand people not only content to ensure consistently exceptional learning experiences. Science is both a body of knowledge and a process. Art is the expression of creativity and imagination. Where they intersect is the best way to help others learn and grow.

Management Thomas S. Bateman, Scott Snell, 2007 B to B, 2002 **A Trainer's Guide to PowerPoint** Mike Parkinson, 2018-10-02 Learn the Secrets Needed to Master PowerPoint for Training. As a successful facilitator, you know the importance of the resources in your professional toolkit. How you engage your audience and improve learning can be affected by how well you use them. But mastery of PowerPoint evades many. Feedback on presentations can range from "What was the point?" to "That changed my life." Most though fall closer to the former. If you are looking for a guide to the PowerPoint practices that will push your presentations into the latter category, look no further. **A Trainer's Guide to PowerPoint Best Practices for Master Presenters** is Mike Parkinson's master class on the art of PowerPoint. While Parkinson wants you to understand how amazing a tool PowerPoint is, he's the first to tell you that there is no magic button to make awesome slides. There are, however, proven processes and tools that deliver successful PowerPoint content each and every time you use them. In this book, he shares them, detailing his award-winning PowerPoint process and guiding you through three phases of presentation development: discover, design, and deliver. What's more, Parkinson is a Microsoft PowerPoint MVP (most valuable professional, an honorific bestowed by Microsoft on those with very deep knowledge of Microsoft products and services). He shares not only his tips and best practices for presentation success but also those from several of his fellow MVPs. Parkinson invites you to master PowerPoint as a tool just like a paintbrush and paint, and to realize that the tool doesn't make the art you do.
