[Computational Intelligence for Decision Support in Cyber-Physical Systems](#) Zeashan H Khan,A. B. M. Shawkat Ali,Zahid Riaz,2014-02-18 This book is dedicated to applied

computational intelligence and soft computing techniques with special reference to decision support in Cyber Physical Systems CPS where the physical as well as the communication segment of the networked entities interact with each other The joint dynamics of such systems result in a complex combination of computers software networks and physical processes all combined to establish a process flow at system level This volume provides the audience with an in depth vision about how to ensure dependability safety security and efficiency in real time by making use of computational intelligence in various CPS applications ranging from the nano world to large scale wide area systems of systems Key application areas include healthcare transportation energy process control and robotics where intelligent decision support has key significance in establishing dynamic ever changing and high confidence future technologies A recommended text for graduate students and researchers working on the applications of computational intelligence methods in CPS

Convex Optimization Euclidean Distance Geometry 2e

Dattorro,2015-09-29 Convex Analysis is an emerging calculus of inequalities while Convex Optimization is its application Analysis is the domain of the mathematician while Optimization belongs to the engineer In layman s terms the mathematical science of Optimization is a study of how to make good choices when confronted with conflicting requirements and demands The qualifier Convex means when an optimal solution is found then it is guaranteed to be a best solution there is no better choice As any convex optimization problem has geometric interpretation this book is about convex geometry with particular attention to distance geometry and nonconvex combinatorial and geometrical problems that can be relaxed or transformed into convexity A virtual flood of new applications follows by epiphany that many problems presumed nonconvex can be so transformed This is a BLACK WHITE paperback A hardcover with full color interior as originally conceived is available at lulu com spotlight dattorro

Multi-point Cooperative Communication Systems: Theory and Applications Ming Ding,Hanwen

Luo,2013-03-15 Multi point Cooperative Communication Systems Theory and Applications mainly discusses multi point cooperative communication technologies which are used to overcome the long standing problem of limited transmission rate caused by the inter point interference Instead of combating the interference recent progress in both academia and industrial standardizations has evolved to adopt the philosophy of exploiting the interference to improve the transmission rate by cooperating among multiple points This book addresses the multi point cooperative communication system systematically giving the readers a clear picture of the technology map and where the discussed schemes may fit This book includes not only the theories of the paradigm shifting multi point cooperative communication but also the designs of sub optimal cooperative communication schemes for practical systems Ming Ding is a senior researcher at Sharp Laboratories of China Hanwen Luo is a professor at Shanghai Jiao Tong University

Statistical Inference via Convex Optimization Anatoli

Juditsky,Arkadi Nemirovski,2020-04-07 This authoritative book draws on the latest research to explore the interplay of high dimensional statistics with optimization Through an accessible analysis of fundamental problems of hypothesis testing and signal recovery Anatoli Juditsky and Arkadi Nemirovski show how convex optimization theory can be used to devise and analyze near optimal statistical inferences Statistical Inference via Convex Optimization is an essential resource for optimization specialists who are new to statistics and its applications and for data scientists who want to improve their

optimization methods Juditsky and Nemirovski provide the first systematic treatment of the statistical techniques that have arisen from advances in the theory of optimization They focus on four well known statistical problems sparse recovery hypothesis testing and recovery from indirect observations of both signals and functions of signals demonstrating how they can be solved more efficiently as convex optimization problems The emphasis throughout is on achieving the best possible statistical performance The construction of inference routines and the quantification of their statistical performance are given by efficient computation rather than by analytical derivation typical of more conventional statistical approaches In addition to being computation friendly the methods described in this book enable practitioners to handle numerous situations too difficult for closed analytical form analysis such as composite hypothesis testing and signal recovery in inverse problems Statistical Inference via Convex Optimization features exercises with solutions along with extensive appendixes making it ideal for use as a graduate text
