Observation and Data _____

- b. The intensity, duration, and time of day of the precipitation are noted for each precipitation episode. The types of vegetation in the area are recorded and classified.

Control _____

- c. The information gathered is compared with the data on the average precipitation and the plant population collected over the last 10 years.

Hypothesis _____

- d. The information gathered by the research team indicates that rainfall has decreased significantly. They propose that deforestation is the primary cause of this phenomenon.
