**Collaborative Leadership** David Archer,Alex Cameron,2013 David Archer and Alex Cameron are founding Directors of Socia Ltd a company which has an international reputation advising leaders of large organizations on how to get more from their business critical relationships Their clients include leaders from sectors such as central government transport oil gas and finance who face particularly significant collaboration challenges Cubierta

**Collaborative Leadership** David Archer,Alex Cameron,2009-02-04 Collaborative leadership is about delivering results across boundaries The nature of that boundary is important whether it s a formal contract or an informal agreement between two parties to work together for a common aim And leaders need to be clear about where the boundary lies and how to use the different capabilities on either side of it to build a positive and efficient relationship As the poet Robert Frost once put it Good fences make good neighbours Getting value from difference is at the heart of the collaborative leader s task But that is not without its challenges As in many marriages it is often this difference in skills experience resources or culture that attracts organisations to work together in the first place Then as time goes by people start to rail against that very difference and try to remove it wherever it causes frustration in the joint operation An often heard criticism is Why can t they be more like us But of course the truth is that if they were you d have lost the very reason that brought the two of you together So collaborative leaders have to pull off a tricky balancing act on the one hand respecting and valuing the differences of a partner while on the other smoothing out some of those differences in the interests of making the relationship work more efficiently At the same time leaders have to learn to share control and to trust a partner to deliver even though that partner may operate very differently from themselves Collaborative leadership is a sophisticated art but mastering this complexity lies at the heart of business success now and in the future
