College Comparison Guide:

The College Comparison Guide Killiaen V. Townsend, 1992-10-01 Provides information on student body admissions transfers cost financial aid housing campus life libraries classes and sports for more than one hundred colleges **Guide to the Most Competitive Colleges** Barron's Educational Series, 2007-08-01 More than 70 of the most academically competitive four year colleges in the United States are described in detail each entry written by a recent graduate of that school The book's personalized entries offer insights that readers aren't likely to find in other college directories such as first hand descriptions of campus environment social life and activities and nearby off campus activities and points of interest Each college profile also includes the standard need to know facts and figures such as admission requirements academic programs tuitions and fees application procedures sources of financial aid library and research facilities student body composition and admission contacts Not every aspiring student can get into America's most competitive colleges and this book also suggests application strategies study strategies essay writing strategies and financing strategies designed to help students gain admission Also featured is a Most Competitive Comparison Chart that presents at a glance statistics for each school **Branded Nation** James B. Twitchell, 2004-09-08 Branding says James Twitchell is nothing more than commercial storytelling brands are the stories that are associated with products For example the special taste of Evian says Twitchell is in the brand not the water Branding has become so successful so ubiquitous that even institutions that we thought were above branding antithetical to branding have succumbed Such cultural institutions as religion higher education and the art world have learned to love Madison Avenue or lose market share Of course most ministers university presidents and museum directors will insist that branding has nothing to do with them but as Twitchell brilliantly demonstrates in this witty insightful examination of three of our most important cultural institutions wherever supply exceeds demand branding follows The rise of the megachurch epitomizes branding in religion From its inception the megachurch was designed not to compete with other churches but to bring in the unchurched especially men worshippers who might otherwise be home watching television or strolling through the mall on a Sunday morning The megachurches have been phenomenally popular none more so than Willow Creek Community Church just south of Chicago one of the oldest megachurches which Twitchell analyzes in *Branded Nation* Colleges and universities have embraced branding as they have grown more alike Especially among the top schools in the country the student bodies the faculties often even the campuses themselves are practically interchangeable What distinguishes each school is the story it tells about itself Now every institution of higher learning has its image organizers its brand managers usually in the admissions or development offices whose job it is to make their institution seem different from all the rest Even museums with their multimillion dollar Monets have seen the advantages of branding The blockbuster exhibitions often put familiar paintings in a new context that is they provide a new narrative branding the art Museums keep expanding their stores placing them not just near the entrance on the ground floor but throughout the museum in the

galleries themselves Some museums such as the Guggenheim even franchise themselves turning the institution itself into a brand In short high culture is beginning to look more and more like the rest of our culture In perhaps his most subversive observation Twitchell doesn't condemn the branding of cultural institutions On the contrary he believes that branding may be invigorating our high culture bringing it to new audiences making it a more integral part of our lives Not since Bobos in Paradise has there been such a trenchant provocative analysis of our world *American Reference Books Annual* June M. Chenoweth, 1995-04-15 With more than 1600 descriptive and evaluative entries ARBA continues its 26 year tradition as a comprehensive review source for reference works published or distributed in the US ARBA 95 encompasses the subject spectrum covering such broad areas as general reference history education economics and business and science and technology Of special note in this edition is increased coverage of CD ROM products More than 350 reviewers provide reviews that cover strengths and weaknesses of the reference works **Resources in Education**, 1993 **Hands-On Career Planning For Teens** P.D.
