AI for Daily Life: 50 Simple Ways Artificial Intelligence Makes Everyday Living Smarter Dizzy Davidson, 2025-07-23

Practical AI for Everyday Living 50 Smart Ways to Simplify Secure and Supercharge Your World If you've ever scrambled to remember appointments or if you've stayed up late wrestling with to do lists this book is for you If you dread mundane chores and crave more free time this book is for you If you wish your home could think for itself keeping you safe saving money and streamlining your life this book is for you Welcome to your ultimate guide to AI in everyday life 50 chapters packed with tips tricks step by step guides real life stories illustrations and clear examples Whether you're a tech beginner or the family go to gadget guru you'll learn how to harness AI to solve the daily headaches that steal your time and peace of mind Inside you'll discover how to Master AI Assistants Wake up with Siri or Alexa prepping your day handling reminders alarms and grocery lists hands free and fuss free Automate Chores Deploy robot vacuums smart thermostats and automated pet feeders that learn your habits so you never vacuum adjust the heat or worry about Fido's dinner again Plan Meals Like a Pro Use AI grocery apps to track your pantry suggest recipes and generate optimized shopping lists in seconds Stay Secure Arm your home with AI driven security cameras doorbells and sensors that distinguish family pets and genuine threats cutting false alarms to zero Predict the Weather Get hyperlocal storm and flood alerts powered by AI models that process satellite radar and historical data for minute by minute accuracy Optimize Sleep Track sleep stages adjust mattress firmness and tune bedroom temperature automatically so you wake up refreshed PLUS Real world case studies from a busy mom who reclaimed her mornings to a college student whose grades soared after fixing her sleep schedule Packed with easy to follow diagrams sidebars and checklists every chapter hands you practical steps you can apply today Stop letting life's small tasks steal your joy Transform your home and habits with AI as your partner so you can focus on what truly matters GET YOUR COPY TODAY

The Artificial Intelligence and Machine Learning Blueprint: Foundations, Frameworks, and Real-World Applications

Priyambada Swain, 2025-08-06 In the current era of data centric transformation Artificial Intelligence AI and Machine Learning ML are influencing organizational strategies and operations The AI and Machine Learning Blueprint serves as a guide connecting academic concepts with industry applications It is intended for both students seeking basic knowledge and professionals interested in deploying scalable AI systems The book covers core mathematical principles relevant to AI including linear algebra probability statistics and optimization and provides an overview of classical machine learning algorithms neural networks and reinforcement learning Concepts are illustrated with practical examples Python code and case studies from sectors such as healthcare finance cybersecurity natural language processing and computer vision Operational considerations are also addressed with chapters on MLOps model deployment explainable AI XAI and ethics The text concludes with information on emerging topics including generative AI federated learning and artificial general intelligence AGI With a blend of theoretical depth and practical relevance this book is an essential blueprint for mastering AI

and ML in today's intelligent systems landscape

Artificial Intelligence and Data Mining Approaches in Security Frameworks Neeraj Bhargava, Ritu Bhargava, Pramod Singh Rathore, Rashmi Agrawal, 2021-08-24 ARTIFICIAL INTELLIGENCE AND DATA MINING IN SECURITY FRAMEWORKS Written and edited by a team of experts in the field this outstanding new volume offers solutions to the problems of security outlining the concepts behind allowing computers to learn from experience and understand the world in terms of a hierarchy of concepts with each concept defined through its relation to simpler concepts Artificial intelligence AI and data mining is the fastest growing field in computer science AI and data mining algorithms and techniques are found to be useful in different areas like pattern recognition automatic threat detection automatic problem solving visual recognition fraud detection detecting developmental delay in children and many other applications However applying AI and data mining techniques or algorithms successfully in these areas needs a concerted effort fostering integrative research between experts ranging from diverse disciplines from data science to artificial intelligence Successful application of security frameworks to enable meaningful cost effective personalized security service is a primary aim of engineers and researchers today However realizing this goal requires effective understanding application and amalgamation of AI and data mining and several other computing technologies to deploy such a system in an effective manner This book provides state of the art approaches of artificial intelligence and data mining in these areas It includes areas of detection prediction as well as future framework identification development building service systems and analytical aspects In all these topics applications of AI and data mining such as artificial neural networks fuzzy logic genetic algorithm and hybrid mechanisms are explained and explored This book is aimed at the modeling and performance prediction of efficient security framework systems bringing to light a new dimension in the theory and practice This groundbreaking new volume presents these topics and trends bridging the research gap on AI and data mining to enable wide scale implementation Whether for the veteran engineer or the student this is a must have for any library This groundbreaking new volume Clarifies the understanding of certain key mechanisms of technology helpful in the use of artificial intelligence and data mining in security frameworks Covers practical approaches to the problems engineers face in working in this field focusing on the applications used every day Contains numerous examples offering critical solutions to engineers and scientists Presents these new applications of AI and data mining that are of prime importance to human civilization as a whole

Charting the Intelligence Frontiers - Edge AI Systems Nexus Ovidiu Vermesan, Alain Pagani, Paolo Meloni, 2026-01-27 We are witnessing a fundamental shift in the computing landscape a paradigm shift where intelligence is rapidly migrating to the very edges of the network This is the era of edge AI which embeds decision making perception and control directly into devices that shape our physical world This book is a selected collection of the presented work from the European Conference on EDGE AI Technologies and Applications EEAI held on 21-23 October 2024 in Cagliari Sardinia Italy The conference is part of a series of annual conferences that delve into the expanding continuum of micro deep and meta

edge architectures which form the backbone of emerging intelligent autonomous systems across numerous sectors. From the complexities of advanced algorithms and the design of novel edge AI hardware accelerators to the architecture of next generation communication networks AI frameworks and software systems the EEAII fosters a vibrant exchange of ideas that are shaping the future and actively defining it. From industrial automation to environmental monitoring from manufacturing to smart mobility the expansion of micro deep and meta edge AI processing is propelling a new class of autonomous systems. These systems thrive on distributed intelligence leveraging advancements in edge AI hardware architectures accelerators performant algorithms and advanced software frameworks. The chapters in this volume celebrate this paradigm shift and offer a glimpse into the vibrant ecosystem shaping the future of edge AI technologies and applications. The numerous chapters describe novel solutions and rigorous investigations spanning verification and validation federated learning neuromorphic design scalable architectures sensor fusion and human machine collaboration each chapter demonstrating the innovation wave fuelling Europe's edge AI landscape. Together these twenty chapters provide a rich multi layered and deeply insightful perspective on the state of edge AI. Each chapter documents the achievements made and highlights the path forward offering a compelling vision of a future where intelligence is seamlessly and securely integrated into the fabric of the real world. This book is an essential guide for navigating understanding and contributing to the dynamic and rapidly evolving field of edge AI. The real value of this book lies in its innovative forward looking perspective offering a guided exploration of the latest scientific breakthroughs and practical advancements shaping intelligent systems at the edge. For researchers students practitioners and visionaries this book provides a comprehensive roadmap for the next stage in the evolution of intelligent connected systems at the edge.

CBSE Class 10 Artificial Intelligence Chapter-wise Question Bank For 2026 Exam | As Per New Syllabus | Including Employability Skills

Noida, 2025-10-02 CBSE Class 10 Artificial Intelligence Chapter wise Question Bank is designed strictly as per the latest CBSE syllabus and exam pattern providing structured topic wise preparation. It covers all chapters of AI 417 including introduction to AI data science basics machine learning concepts neural networks and ethical AI with MCQs competency based case study and application oriented questions. Each chapter includes clear explanations and practice questions to strengthen concept clarity practical understanding and exam readiness making it ideal for CBSE Class 10 AI board exam preparation.

Exploring Cognitive, Affective, Design Thinking, Artificial Intelligence, Cybernetics and E-Learning Dimensions in Contemporary Education

, 2025-12-18 This volume offers a timely and forward looking examination of how emerging technologies teaching innovations and interdisciplinary theories are reshaping education globally. It addresses the convergence of cognitive and emotional learning design thinking artificial intelligence and cybernetics across all levels of education from early childhood to higher education and initial teacher education. Through conceptual inquiry and applied research this volume provides insights into how educators and institutions can evolve to meet the changing demands of an increasingly digital and interconnected

world **Trustworthy AI in Medical Imaging** Marco Lorenzi,Maria A Zuluaga,2024-11-25 Trustworthy AI in Medical Imaging brings together scientific researchers medical experts and industry partners working in the field of trustworthiness bridging the gap between AI research and concrete medical applications and making it a learning resource for undergraduates masters students and researchers in AI for medical imaging applications The book will help readers acquire the basic notions of AI trustworthiness and understand its concrete application in medical imaging identify pain points and solutions to enhance trustworthiness in medical imaging applications understand current limitations and perspectives of trustworthy AI in medical imaging and identify novel research directions Although the problem of trustworthiness in AI is actively researched in different disciplines the adoption and implementation of trustworthy AI principles in real world scenarios is still at its infancy This is particularly true in medical imaging where guidelines and standards for trustworthiness are critical for the successful deployment in clinical practice After setting out the technical and clinical challenges of AI trustworthiness the book gives a concise overview of the basic concepts before presenting state of the art methods for solving these challenges Introduces the key concepts of trustworthiness in AI Presents state of the art methodologies for trustworthy AI in medical imaging Outlines major initiatives focusing on real world deployment of trustworthy principles in medical imaging applications Presents outstanding questions still to be solved and discusses future research directions

Activating Academia for an Era of Colliding Crises Alison Julia Katherine Green,Adam R. Aron,James Dyke,2025-10-28 While there has been discussion for decades about the need to rethink the core purpose of academia to enable all to live well on a planet of finite resources humanity s present predicaments point to a paradox at the heart of the academic enterprise Although academic institutions have originated research and innovations that underpin much of what we view as development and progress these same advances are also responsible for the global crises we now face Indeed many voices are now arguing that academia can and must do more to drive the transformative change that is needed if we are to avert the imminent catastrophe that is almost upon us The Alliance for Sustainability leadership in Education EAUC in conjunction with Second Nature and the United Nations Environment s Youth and Education Alliance announced in 2019 that over 7 000 higher and further education institutions across six continents were declaring a climate emergency with a three point plan for action as part of the Race to Zero This enshrined a bolder commitment from academia to play its part in achieving net zero greenhouse gas emissions While there has been success over several decades in fostering Education for Sustainable Development ESD and in embedding sustainability in curricula the efficacy of this has arguably been limited by the disciplinary silos in which academics find themselves Similarly the research and scholarly work that is needed to fully understand planetary limits transcends the traditional silos of academic disciplines This Research Topic then will examine what needs to change to optimise ESD and transdisciplinary approaches to research and teaching It will explore ways in which theories of change can be brought to bear on these issues Our Research Topic also centres on the responsibility

acknowledged increasingly by academics for academic institutions and sectors and for academics themselves to do more As trusted educators communicators and policy influencers academia has unique potential and responsibility to guide students and society through this transition to a better future In the case of many academics this means embracing advocacy and activism as their moral responsibility at this point in humanity's history To this end the Research Topic will consider ways in which climate justice principles may be used to explore the responsibilities of academic institutions as one example of an actor with the capacity to influence the drivers of climate breakdown to act In some nations academic institutions have fallen prey to a set of neoliberal assumptions that have arguably diminished the agency of individual academics The marketisation of higher education is rife in some nations e g UK and US and while some academics have documented rising inequality a deepening climate and ecological crisis socio economic breakdown and the deteriorating psychological and physical well being these engender they have so far proven mostly powerless to reorient their fields to confront these challenges at the institutional level Consequently they remain unable to pursue an agenda for change that benefits their students and wider society This Research Topic welcomes research that explores actions available to academics from diverse perspectives including models of behavioural change Decades of research have shown that warnings do not work and that evidence based recommendations do not necessarily translate into policy or institutional change Academics increasingly refer to a broken science society contract suggesting that calls to listen to the science and expectations that warnings issued by scientists will be heeded reflect a depoliticized view of the relationships between science and society This failure to recognise the intricate ways in which science and policy are connected raises questions about the neutrality of research and the academic enterprise Our Research Topic invites articles that explore how we might re make the science society contract Questions about the independence and interdependence of research and teaching inevitably arise when academic institutions are in receipt of funds from corporations charities foundations and individuals Institutions can be compromised by vested interests often in the form of corporate interests that can influence research curriculum and staff appointments and the will of senior management to address this problem is poor While there are laudable initiatives aimed at resolving intersecting challenges and promoting transdisciplinary approaches in higher education it is fair to say that increasing numbers of academics globally realise that we are not set up to ready society for an era of colliding environmental and social crises Many fear that academia is guilty of perpetuating the problems that have created this crisis And while growing numbers hold this view few have ready answers as to what more academics and academic institutions can do In spite of this some academics have chosen to step outside of their conventional roles embracing advocacy and activism either taking individual action outside of their role or seeking to drive change within their institutions One problem is that action is fragmented often reliant upon the energies and tenacity of one or more individuals who have sought to re define their roles to embrace the responsibility they feel to act The Research Topic will serve to aggregate work on academic activism and to raise awareness of ways in which

academics can act It will also examine the notion that we need to remake the science society contract and will explore what that entails The Research Topic will explore the interrelations between science and society and highlight the need to examine political dimensions of decision making and knowledge production To begin to provide answers to the questions of what it is that academics can do to drive transformational change this Research Topic brings together voices from diverse disciplines and nations Their voices have in common one thing each has reflected on or re imagined their role and purpose as an academic and each has embraced advocacy or activism The articles will be organised around three broad themes i In what ways are our academic institutions either failing or succeeding We invite articles that expose the overt and covert influences on academia such as neoliberal structures and fossil fueled research agendas We also invite articles centred on examples of good practice such as initiatives to foster transdisciplinary approaches to research and education ii Trailblazers for transformative change We invite case studies and critiques from the front lines from academics exploring and putting into practice their own take on What can I do Evaluations of what has and has not worked to drive change at the institutional and individual levels are welcomed iii The disruptors that are already initiating transformations in HE The growth of for profit private providers open access teaching resources and other online approaches that threaten the business models of existing public and nonprofit institutions who struggle to compete with the relevance and just in time education that is becoming available via novel actors We welcome articles exploring the potential for disruption *Artificial Intelligence* Rainer Born,1989 *Introducing Model Engineering* H. R. Hadlow,1948 **Computers and Artificial Intelligence** ,1996

Applications of Artificial Intelligence ,1988 **The Development of a Cross-cultural Instructional Model Comparing the Chinese and Western Landscape Painting** John Adams Walter,1978 **Artificial Intelligence, Simulation, and Modeling** Lawrence E. Widman,Kenneth A. Loparo,Norman Nielson,1989-09-06 This interdisciplinary approach to computer modeling addresses both traditional simulationists seeking the greater representational flexibility and ease of use that AI techniques offer and computer scientists seeking the greater power and realism that rigorous simulation techniques can provide First section reveals the theoretical underpinnings of AI and simulation Second section describes application of simulation techniques to current problems in AI research Third section discusses application of AI methods to simulation *Evils of the Cities* Thomas De Witt Talmage,1903 **Proceedings of the ... International Joint Conference on Artificial Intelligence** ,1997 **AI and Expertise** Henri Farreny,1989 **Japan Review** ,2013 *Encyclopedia of Artificial Intelligence* Stuart Charles Shapiro,1992 *A Level of Aspiration Model for Group Decision Making* Donald L.
