GBCE's Green Design Brief: a holistic blueprint for human centered, cost effective sustainable project concepts

Armelle Le Bihan , We humans have been hit by one of the biggest disruptions of our times which has put the world on hold and is shedding light on the way we live among ourselves and with the rest of living creatures The world is redefining the

way we will work play and live and people are looking to placing health safety wellbeing and quality of life at the top of their priorities At the same time our planet s health itself has never been put to such extreme stress We ve lost more than 50% of

our biodiversity hit this year again a temperature record and are counting more cities with unhealthy levels of PM2 5 by the minute We are at a crossroad where we need to decide and act upon the future we want Emerging countries in Asia have a

unique opportunity to leapfrog to the green smart and healthy cities of the future by starting to build them now while their major population centers are still growing fast It is in our buildings backbones to our societies and our human activities that

we can regenerate our living environment and build our resiliency to future challenges This design brief was made to give building industry stakeholders guidelines for the design and retrofit of green smart and healthy buildings in the Asia Pacific

region It is meant for project managers to learn about best practices and use practical guidelines to get started on the implementation of green features for projects across all industries such as hospitality office healthcare retail residential

industrial cultural educational projects As engineers and consultants our objective is to share our expertise of sustainable building design to help bring up high performance buildings that promote people s wellbeing while preserving the planet

Here you will find market insights a business case for green buildings focused on Southeast Asian countries introduction to green building design concepts presentation and comparison of several environmental standards and certifications guidelines

for integrating green features to your project and a showcase of 10 green and smart innovations to implement in your next development or facility We hope that you will find in these pages the means to take off your next development project and to

push it further towards the sustainable resilient healthy and smart places that people expect What can you expect to achieve with The Green Design Brief Improve the value of your asset for your investors Appeal to the community demonstrate

corporate responsibility and improve your branding Mitigate risk of obsolescence and non compliance to regulation Reduce

costs across the board from design construction to operational and maintenance costs Gain a competitive advantage

Differentiate yourself from the competition by implementing impactful green features into your project Reach green building standards demonstrate high quality credentials and stand at the forefront of international best practices Benefit from higher

sales rental premiums and greater occupancy Ensure indoor environmental quality and healthy environments for your

customers Book Outline PART 1 See how buildings are a fundamental solution for climate adaptation and mitigation decarbonizing our economy and key to the liveability of our cities in the region PART 2 Capture the evidence supporting the business case for smart green and healthy buildings Recognize the many value propositions of sustainable buildings from lower operating costs improved occupants health and productivity increased asset value increased return on investment PART 3 Understand how climatic conditions play a role in designing responsible performant and fit for purpose projects PART 4 Grasp the underlying principles process behind people centered bioclimatic concepts bioclimatic architecture designing with nature integrative process multidisciplinary team PART 5 Understand how certifications compare and what they mean for your next project With all the green building certifications out there it can be hard to find your way around Have you ever wondered how different are certifications what are their areas of focus how suitable they are for your project and ultimately which certification you should go for We ve compiled a synthesized description of 4 most commonly used certifications in Thailand their process performance rating system and how they compare so you can better set a direction for your project PART 6 Measure the performance of your project with key design metrics for comfort health energy efficiency and water conservation Design metrics health comfort energy water We have developed a set of pillars which cover all fundamentals of integrated sustainability and will bring meaningful and impactful results to your project PART 7 Apply technical recommendations early into your design concepts to ensure your project s sustainability results Technical guidelines Things to look after at the onset of a project that will ensure your project s on the right track to reach high performance standards PART 8 Explore Discover efficient green features that will support your building s sustainability performance to implement in your next project
