**Data Management for eRobotics Applications** Martin Hoppen, 2017-10-05 This work presents a new universal data management approach for eRobotics applications using distributed databases The development and lifecycle of robotic systems features a high degree of complexity made manageable by the eRobotics approach that combines electronic media 3D simulation and robotics The basis for any eRobotics application is a comprehensive 3D model of the system and its environment Such highly complex models require an efficient data management provided in this thesis *Information Systems Reengineering, Integration and Normalization* Joseph S. P. Fong, Kenneth Wong Ting Yan, 2022-01-01 Database technology is an important subject in Computer Science Every large company and nation needs a database to store information The technology has evolved from file systems in the 60 s to Hierarchical and Network databases in the 70 s to relational databases in the 80 s object oriented databases in the 90 s and to XML documents and NoSQL today As a result there is a need to reengineer and update old databases into new databases This book presents solutions for this task In this fourth edition Chapter 9 Heterogeneous Database Connectivity HDBC offers a database gateway platform for companies to communicate with each other not only with their data but also via their database The ability of sharing a database can contribute to the applications of Big Data and surveys for decision support systems The HDBC gateway solution collects input from the database transfers the data into its middleware storage converts it into a common data format such as XML documents and then distributes them to the users HDBC transforms the common data into the target database to meet the user s requirements acting like a voltage transformer hub The voltage transformer converts the voltage to a voltage required by the users Similarly HDBC transforms the database to the target database required by the users This book covers reengineering for data conversion integration for combining databases and merging databases and expert system rules normalization for eliminating duplicate data from the database and above all HDBC connects all legacy databases to one target database for the users The authors provide a forum for readers to ask questions and the answers are given by the authors and the other readers on the Internet **Performing Digital** David Carlin, Laurene Vaughan, 2016-03-03 Digital technologies have transformed archives in every area of their form and function and as technologies mature so does their capacity to change our understanding and experience of material and performative cultural production There has been an exponential explosion in the production and consumption of video online and yet there is a scarcity of knowledge and cases about video and the digital archive This book seeks to address that through the lens of the project Circus Oz Living Archive This project provides the case study foundation for the articulation of the issues challenges and possibilities that the design and development of digital archives afford Drawn from eight different disciplines and professions the authors explore what it means to embrace the possibilities of digital technologies to transform contemporary cultural institutions and their archives into new methods of performance representation and history **Contemporary Strategies and Approaches in 3-D**

**Information Modeling** Kumar, Bimal, 2018-05-18 It is generally accepted that building information modeling BIM related technologies offer considerable advantages to many participants in the construction sector Currently there exists a whole range of commercially available BIM software platforms that are specialized to suit the functional needs of their main users Contemporary Strategies and Approaches in 3 D Information Modeling is a critical scholarly resource that examines building information modeling and the integration of 3 D information in the urban built environments Featuring coverage on a broad range of topics such as integrated project delivery design collaboration and 3 D model visualization this book is geared towards engineers architects contractors consultants and facility managers seeking current research on methodologies concepts and instruments being used in the field of 3 D information modeling *Database Systems* Ramez
