In EVERY company, organization, and department. Unless you are talking about a one-time single-use project within a business, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, "What are we really trying to accomplish here?" And is there a different way to look at it? For more than twenty years, *The Art of Service's Self Assessments* empower people who can do just that, whether their title is marketer, entrepreneur, manager, salesperson, consultant, business process manager, executive assistant, IT Manager, CxO, etc. They are the people who rule the future.
