Islamic Art and Spirituality Seyyed Hossein Nasr,1987-02-12 With remarkable breadth of vision Seyyed Hossein Nasr reveals for both Western and Muslim readers how each art form in the islamic tradition is based upon a science of nature concerned not with the outer appearance of things but with their inner reality Ranging across calligraphy painting architecture literature music and the plastic arts Nasr penetrates to the inner dimension of Islam and shows the role art plays in the life of individual Muslims and the community as a whole the role of inspiring the remembrance and contemplation of God Once the author establishes art as an aid and support to the spiritual life he traces the creative act to its ultimate source inner knowledge and barakah or grace which make the crystallization of inner realities in form and space and time possible Through this knowledge and grace the author asserts unity manifests upon the plane of multiplicity making archetypal realities perceivable by the senses Through this knowledge and grace art functions as a ladder for the journey of the soul from the visible to the invisible How Islamic art leads man to the inner chamber of divine revelation forms the substance of much of this important work An especially close look is given to the Sufi tradition within Islam for its mystical teachers have often clearly demonstrated in their works the spiritual significance of beauty and served as the source of inspiration for art By rediscovering the root of art in the Islamic tradition Seyyed Hossein Nasr opens doors to new dimensions of unity which have seemingly been obscured in recent Western art In so doing he extends the significance of this book beyond the Islamic belief system to touch the hearts and creative impulses of readers from all traditions

Islamic art evolved as it has what forms does it take what is the logic underlying it What message is the Muslim artist attempting to convey what emotion is he seeking to evoke This work views Islamic art as a subject of archeological study and treats its evolution as part of the historical study of art in the broader sense At the same time it paves the way for an epistemological shift from viewing Islamic art as a material concept having to do with beautiful rarities and relics that have grown out of Islamic cultural and artistic creativity to a theoretical concept associated with a vision a principle a theory and a method This theoretical concept provides the intellectual and cultural foundation for a critical philosophical science of Islamic artistic beauty to which we might refer as the science of Islamic art or the Islamic aesthetic that evaluates visual artistic creations in terms of both beauty and practical usefulness In the process the study also explores orientalist misconceptions challenging some of the premises with which it has approached Islamic art with judgement rooted in a cultural framework alien to the spiritual perspective of Islam
