## **Data Protection And Facebook Data Protection And Facebook:**

**Data Protection and Facebook** Patricia Rogosch, Erik Hohl, 2012 Consenting or not consenting when reading the privacy policy of a social network service one might wonder why he or she is asked to accept the privacy policy Does one have a choice This survey analyzes the status quo of current practices and policies of service providers to obtain consent in Europe It reveals the main purposes for which they collect use and disclose users personal data The often cited informed user needs information about what she or he is consenting to Is the privacy policy easily readable and accessible How long is the average European data use policy These and other questions were answered in this survey by analyzing 140 user generated content websites e g Facebook Series Reports on Information Telecommunication and Media Law Vol 18 *The Impact of the EU-General Data Protection Regulation on Facebook and Google* Bilge Huschebeck, 2020-05 One of the primary aims of the GDPR is to increase the participation of data subjects and to grant them more control over their data Since Google and Facebook are global companies collecting and processing vast amounts of personal data their compliance with the GDPR is essential to ensure better protection of the data subjects The key challenge now is whether the GDPR impacts the business model of Facebook and Google since the scandal of Cambridge Analytica revealed that transparency has no meaning in today s online market where individuals data is the currency Even though GDPR provides some fundamental rights for the data subjects it could be argued that the data subjects have no effective control over their data in the online market in practice Therefore it is necessary to analyse whether GDPR sets adequate safeguards regarding the data subjects rights regarding data owners consent purpose limitation principle and the right to be informed as well as whether these companies meet the requirements of the GDPR in practice Thus the aim of this book is to illuminate the interaction of legislative decree and business practices of Facebook and Google *Facebook and the (EU) Law* Philippe Jougleux, 2022-07-14 The past two decades have seen a radical change in the online landscape with the emergence of GAFAM Google Amazon Facebook Apple and Microsoft Facebook specifically has acquired a unique monopoly position among social media and is part of the digital lives of billions of users A mutual influence between Facebook and the legal framework has gradually emerged as EU legislators and judges are on the one hand forced to accept the reality of new widespread behaviors and practices and on the other have constructed a legal framework that imposes limits and rules on the use of the social network This book offers a unique perspective on this relationship exploring the various activities and services proposed by Facebook and discussing the attendant legal issues Accordingly questions concerning the GDPR its principles rights and obligations are in the center of the discussions However the book does not limit its scope to data protection Facebook has also greatly contributed to a liberalization and democratization of speech In accordance the classic principles of media law must be revisited adapted or suitably enforced on the platform Intellectual property law governs what is owned and by whom no matter whether raw data or informational goods are concerned Frameworks on hate speech and fake news are the result

of coregulation principles of governance whereas defamation jurisprudence continues to evolve considering the consequences of merely liking certain content The economic model of advertising is also governed by strict rules Above all Facebook is currently caught in a dilemma of substantial interest for society as a whole is it a neutral online intermediary i e merely a passive player on the Internet or is it transforming against its will into an editorial service In conclusion the book has a dual purpose First it proposes a global and practical approach to the EU legal framework on Facebook Second it explores the current limits and the ongoing transformation of EU Internet law as it steadily adapts to life in the new digital world

### **Coherence between Data Protection and Competition Law in Digital Markets** Klaudia Majcher,2023-10-09

In digital markets data protection and competition law affect each other in diverse and intricate ways Their entanglement has triggered a global debate on how these two areas of law should interact to effectively address new harms and ensure that the digital economy flourishes Coherence between Data Protection and Competition Law in Digital Markets offers a blueprint for bridging the disconnect between data protection and competition law and ensuring a coherent approach towards their enforcement in digital markets Specifically this book focuses on the evolution of data protection and competition law their underlying rationale their key features and common objectives and provides a series of examples to demonstrate how the same empirical phenomena in digital markets pose a common challenge to protecting personal data and promoting market competitiveness A panoply of theoretical and empirical commonalities between these two fields of law as this volume shows are barely mirrored in the legal enforcement policy and institutional approaches in the EU and beyond where the silo approach continues to prevail The ideas that Majcher puts forward for a more synergistic integration of data protection and competition law are anchored in the concept of sectional coherence This new coherence centred paradigm reimagines the interpretation and enforcement of data protection and competition law as mutually cognizant and reciprocal allowing readers to explore in an innovative way the interface between these legal fields and identify positive interactions instead of merely addressing inconsistencies and tensions This book reflects on the conceptual practical institutional and constitutional implications of the transition towards coherence and the relevance of its findings for other jurisdictions

### **Data Privacy and GDPR Handbook** Sanjay Sharma,2019-11-27

The definitive guide for ensuring data privacy and GDPR compliance Privacy regulation is increasingly rigorous around the world and has become a serious concern for senior management of companies regardless of industry size scope and geographic area The Global Data Protection Regulation GDPR imposes complex elaborate and stringent requirements for any organization or individuals conducting business in the European Union EU and the European Economic Area EEA while also addressing the export of personal data outside of the EU and EEA This recently enacted law allows the imposition of fines of up to 5% of global revenue for privacy and data protection violations Despite the massive potential for steep fines and regulatory penalties there is a distressing lack of awareness of the GDPR within the business community A recent survey conducted in the UK suggests that only 40% of firms are even aware of the new law and

their responsibilities to maintain compliance The Data Privacy and GDPR Handbook helps organizations strictly adhere to data privacy laws in the EU the USA and governments around the world This authoritative and comprehensive guide includes the history and foundation of data privacy the framework for ensuring data privacy across major global jurisdictions a detailed framework for complying with the GDPR and perspectives on the future of data collection and privacy practices Comply with the latest data privacy regulations in the EU EEA US and others Avoid hefty fines damage to your reputation and losing your customers Keep pace with the latest privacy policies guidelines and legislation Understand the framework necessary to ensure data privacy today and gain insights on future privacy practices The Data Privacy and GDPR Handbook is an indispensable resource for Chief Data Officers Chief Technology Officers legal counsel C Level Executives regulators and legislators data privacy consultants compliance officers and audit managers     **GDPR** Kimberly Houser, 2019 EU Data Protection Agencies have been vigorously enforcing violations of regional and national data protection law in recent years against U S tech companies but few changes have been made to their business model of exchanging free services for personal data With the Cambridge Analytica debacle revealing how insufficient American privacy law is we now find ourselves questioning whether the General Data Protection Regulation GDPR is not the onerous 99 article regulation to be feared but rather a creation years ahead of its time This paper will explain how the differences in U S and EU privacy and data protection law and ideology have led to a wide divergence in enforcement actions and what U S companies will need to do in order legally process the data of their users in the EU The failure of U S tech companies to fulfill the requirements of the GDPR which has extraterritorial application and becomes applicable on May 25 2 could result in massive fines up to 4 billion using the example of Google The GDPR will mandate a completely new business model for these U S tech companies that have been operating for well over a decade with very loose restrictions under U S law Will the GDPR be the end of Google and Facebook or will it be embraced as the gold standard of how companies ought to operate

**Corporate Governance and the new GDPR (General Data Protection Regulation)** Robert Komorowsky, 2018-08-22 Seminar paper from the year 2018 in the subject Law Data protection grade 2 0 University of Applied Sciences Aalen course Emergent Issues in Governance language English abstract After nearly five years of intensive work accompanied with charged political discussions and wide societal echo the European Union's EU Data Protection Reform has finally become a reality The new framework consists of a General Data Protection Regulation GDPR which replaced the former Data Protection Directive and a new Directive for the police and criminal justice sector They came into force in May 2016 and became applicable law in May 2018 The reform aims at modernizing and harmonizing data protection across the EU and is an essential element of the broader and particularly ambitious Digital Single Market Strategy that the EU launched in parallel and whose far reaching consequences will unfold in the years to come As this new European Data Protection Regulation will obviously entail many changes for all kinds of companies in the EU and thus Germany the aim of this seminar paper is to answer the following

question What measures do German companies have to implement in order to meet the data protection requirements of the new EU GDPR which is applicable since May 25th 2018 To answer this question first some important terms that play a role in the regulation are defined e g privacy by design privacy by default Then a systematic literature analysis is carried out to identify the most important contents of the GDPR such as possible penalties for non compliance In addition it will be described how companies outside the EU will be affected by this European legislation Next it will be examined which are the crucial differences of the GDPR compared to the former German Bundesdatenschutzgesetz BDSG which documentary measures companies must implement as well as which infringements must be reported to supervisory authorities Furthermore the state of sources for this most current topic will be discussed by reviewing the various types of literature journals scientific papers professional service firm literature used in this seminar paper Last but not least the most important results of this seminar paper are summarised and then based on these conclusions four theses are presented and substantiated Finally an outlook is given on further regulations that are currently in the EU legislative process and will come into effect in the coming years

Facebook Security Breach. Security Risk Analysis and Recommendation Oluwagbenga Afolabi, 2018-06-01 Seminar paper from the year 2018 in the subject Communications Multimedia Internet New Technologies grade 100 00 Saint Leo University language English abstract Facebook has revolutionized the way people End users communicate with peers and close relatives these users share personal information with Facebook The platform in turn uses these users information to match them with other users who share similarities in information through algorithms The primary focus of this paper is on the security implications of users sharing their personal information on Facebook Additionally we will examine the recent data security breach on Facebook involving Cambridge analytical and its implication for Facebook and other data mining entities The analysis will examine the loophole exploited by third party apps to gain elevated access to users and sub user data We also want to establish if Facebook is taken appropriate steps to safeguard user information by following the federal trade commission guidelines in protecting user information
