Logic Gates, Circuits, Processors, Compilers and Computers Jan Friso Groote, Rolf Morel, Julien Schmaltz, Adam Watkins, 2021-08-18 This undergraduate textbook first introduces basic electronic circuitry before explaining more advanced elements such as the Arithmetic Logic Unit sequential circuits and finally microprocessors. In keeping with this integrated and graduated approach the authors then explain the relationship to first assembly programming then higher level languages and finally computer organisation. Authors use the Raspberry Pi and ARM microprocessors for their explanations. The material has been extensively class tested at TU Eindhoven by an experienced team of lecturers and researchers. This is a modern holistic treatment of well established topics valuable for undergraduate students of computer science and electronics engineering and for self study. The authors use the Raspberry Pi and ARM microprocessors for their explanations.

Moura, Joaquín Catalá, 2013-12-31 The management of construction projects is a wide ranging and challenging discipline in an increasingly international industry facing continual challenges and demands for improvements in safety in quality and cost control and in the avoidance of contractual disputes. Construction Management grew out of a Leonardo da Vinci project to develop a series of Common Learning Outcomes for European Managers in Construction. Financed by the European Union the project aimed to develop a library of basic materials for developing construction management skills for use in a pan European context. Focused exclusively on the management of the construction phase of a building project from the contractor's point of view. Construction Management covers the complete range of topics of which mastery is required by the construction management professional for the effective delivery of new construction projects. With the continued internationalisation of the construction industry Construction Management will be required reading for undergraduate and postgraduate students across Europe.
