   Data Mining: Foundations and Practice Tsau Young Lin,Ying Xie,Anita Wasilewska,Churn-Jung Liau,2008-08-17 The IEEE ICDM 2004 workshop on the Foundation of Data Mining and the IEEE ICDM 2005 workshop on the Foundation of Semantic Oriented Data and Web Mining focused on topics ranging from the foundations of data mining to new data mining paradigms The workshops brought together both data mining researchers and practitioners to discuss these two topics while seeking solutions to long standing data mining problems and stimul ing new data mining research directions We feel that the papers presented at these workshops may encourage the study of data mining as a scienti c eld and spark new communications and collaborations between researchers and practitioners Toexpressthevisionsforgedintheworkshopstoawiderangeofdatam ing researchers and practitioners and foster active participation in the study of foundations of data mining we edited this volume by involving extended and updated versions of selected papers presented at those workshops as well as some other relevant contributions The content of this book includes st ies of foundations of data mining from theoretical practical algorithmical and managerial perspectives The following is a brief summary of the papers contained in this book   **Data Mining: Foundations and Practice** Tsau Young Lin,Ying Xie,Anita Wasilewska,Churn-Jung Liau,2008-08-20 The IEEE ICDM 2004 workshop on the Foundation of Data Mining and the IEEE ICDM 2005 workshop on the Foundation of Semantic Oriented Data and Web Mining focused on topics ranging from the foundations of data mining to new data mining paradigms The workshops brought together both data mining researchers and practitioners to discuss these two topics while seeking solutions to long standing data mining problems and stimul ing new data mining research directions We feel that the papers presented at these workshops may encourage the study of data mining as a scienti c eld and spark new communications and collaborations between researchers and practitioners Toexpressthevisionsforgedintheworkshopstoawiderangeofdatam ing researchers and practitioners and foster active participation in the study of foundations of data mining we edited this volume by involving extended and updated versions of selected papers presented at those workshops as well as some other relevant contributions The content of this book includes st ies of foundations of data mining from theoretical practical algorithmical and managerial perspectives The following is a brief summary of the papers contained in this book   **Advances in Machine Learning II** Jacek Koronacki,Zbigniew W. Ras,Slawomir T. Wierzchon,2009-12-24 This is the second volume of a large two volume editorial project we wish to dedicate to the memory of the late Professor Ryszard S Michalski who passed away in 2007 He was one of the fathers of machine learning an exciting and relevant both from the practical and theoretical points of view area in modern computer science and information technology His research career started in the mid 1960s in Poland in the Institute of Automation Polish Academy of Sciences in Warsaw Poland He left for the USA in 1970 and since then had worked there at various universities notably at the University of Illinois at Urbana Champaign and finally until his untimely death at George Mason University We the

editors had been lucky to be able to meet and collaborate with Ryszard for years indeed some of us knew him when he was still in Poland After he started working in the USA he was a frequent visitor to Poland taking part at many conferences until his death We had also witnessed with a great personal pleasure honors and awards he had received over the years notably when some years ago he was elected Foreign Member of the Polish Academy of Sciences among some top scientists and scholars from all over the world including Nobel prize winners Professor Michalski s research results influenced very strongly the development of machine learning data mining and related areas Also he inspired many established and younger scholars and scientists all over the world We feel very happy that so many top scientists from all over the world agreed to pay the last tribute to Professor Michalski by writing papers in their areas of research These papers will constitute the most appropriate tribute to Professor Michalski a devoted scholar and researcher Moreover we believe that they will inspire many newcomers and younger researchers in the area of broadly perceived machine learning data analysis and data mining The papers included in the two volumes Machine Learning I and Machine Learning II cover diverse topics and various aspects of the fields involved For convenience of the potential readers we will now briefly summarize the contents of the particular chapters   **Human Rights and Ethics: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources,2014-09-30 In today s increasingly interconnected and global society the protection of basic liberties is an important consideration in public policy and international relations Profitable social interactions can begin only when a foundation of trust has been laid between two parties Human Rights and Ethics Concepts Methodologies Tools and Applications considers some of the most important issues in the ethics of human interaction whether in business politics or science and technology Covering issues such as cybercrime bioethics medical care and corporate leadership this four volume reference work will serve as a crucial resource for leaders innovators educators and other personnel living and working in the modern world   Interval-Valued Intuitionistic Fuzzy Sets Krassimir T. Atanassov,2019-09-21 The book offers a comprehensive survey of interval valued intuitionistic fuzzy sets It reports on cutting edge research carried out by the founder of the intuitionistic fuzzy sets Prof Krassimir Atanassov giving a special emphasis to the practical applications of this extension A few interesting case studies such as in the area of data mining decision making and pattern recognition among others are discussed in detail The book offers the first comprehensive guide on interval valued intuitionistic fuzzy sets By providing the readers with a thorough survey and important practical details it is expected to support them in carrying out applied research and to encourage them to test the theory behind the sets for new advanced applications The book is a valuable reference resource for graduate students and researchers alike   Foundations of Data Mining and Knowledge Discovery Tsau Young Lin,Setsuo Ohsuga,Churn-Jung Liau,Xiaohua Hu,Shusaku Tsumoto,2005-09-02 Foundations of Data Mining and Knowledge Discovery contains the latest results and new directions in data mining research Data mining which integrates various technologies including computational intelligence database and knowledge management machine learning

soft computing and statistics is one of the fastest growing fields in computer science Although many data mining techniques have been developed further development of the field requires a close examination of its foundations This volume presents the results of investigations into the foundations of the discipline and represents the state of the art for much of the current research This book will prove extremely valuable and fruitful for data mining researchers no matter whether they would like to uncover the fundamental principles behind data mining or apply the theories to practical applications **Foundations and Advances in Data Mining** Wesley Chu,Tsau Young Lin,2005-09-15 With the growing use of information technology and the recent advances in web systems the amount of data available to users has increased exponentially Thus there is a critical need to understand the content of the data As a result data mining has become a popular research topic in recent years for the treatment of the data rich and information poor syndrome In this carefully edited volume a theoretical foundation as well as important new directions for data mining research are presented It brings together a set of well respected data mining theoreticians and researchers with practical data mining experiences The presented theories will give data mining practitioners a scientific perspective in data mining and thus provide more insight into their problems and the provided new data mining topics can be expected to stimulate further research in these important directions **Data mining: foundations and intelligent paradigms** Dawn E. Holmes,Lakhmi C. Jain, *Databases for Data-Centric Geotechnics* Chong Tang,Kok-Kwang Phoon,2024-12-20 Databases for Data Centric Geotechnics forms a definitive reference and guide to databases in geotechnical and rock engineering to enhance decision making in geotechnical practice using data driven methods This second volume pertains to geotechnical structures The opening chapter presents a substantial survey of performance databases and the effectiveness of our prediction models in matching the field measurements in these databases based on 1 full scale field tests 2 39 prediction exercises organized as a part of international conferences and 3 comparison between numerical analyses and in situ or field measurements conducted by the French LCPC The focus is on the evaluation of the statistical degree of confidence in predicting various of quantities of interest such as capacity and deformation The following 18 chapters then present databases on the performance of shallow foundations spudcan foundations deep foundations anchors and pipelines retaining systems and excavations and landslides The databases were compiled from studies undertaken in many countries such as Australia Belgium Bolivia Brazil Canada China Egypt France Germany Hungary Iran Ireland Japan Kenya Malaysia Netherlands Norway Poland Portugal South Africa the United Kingdom and the United States This volume on geotechnical structures is a companion to the volume on site characterization Databases for Data Centric Geotechnics represents the most diverse and comprehensive assembly of database research in a single publication consisting of two volumes to date It follows from Model Uncertainties for Foundation Design also published by CRC Press and suits specialist geotechnical engineers researchers and graduate students Chapter 10 of this book is freely available as a downloadable Open Access PDF at http www taylorfrancis com under a Creative Commons Attribution CC BY 4
