Min Tjoa, 1999 This book constitutes the refereed proceedings of the First International Conference on Data Warehousing and Knowledge Discovery DaWaK 99 held in Florence, Italy, in August/September 1999. The 31 revised full papers and nine short papers presented were carefully reviewed and selected from 88 submissions. The book is divided in topical sections on data warehouse design, online analytical processing, view synthesis, selection and optimization, multidimensional databases, knowledge discovery, association rules, indexing, and object similarities, generalized association rules, and data and web mining, time series data bases, data mining applications, and data analysis.

*Integration of Data Mining in Business Intelligence Systems* Azevedo, Ana, Santos, Manuel Filipe, 2014-09-30 Uncovering and analyzing data associated with the current business environment is essential in maintaining a competitive edge. As such, making informed decisions based on this data is crucial to managers across industries. *Integration of Data Mining in Business Intelligence Systems* investigates the incorporation of data mining into business technologies used in the decision-making process. Emphasizing cutting-edge research and relevant concepts in data discovery and analysis, this book is a comprehensive reference source for policymakers, academicians, researchers, students, technology developers, and professionals interested in the application of data mining techniques and practices in business information systems.

*Data Mining and Multi-agent Integration* Longbing Cao, 2009-07-25 Data Mining and Multi-agent Integration aims to reflect state-of-the-art research and development of agent mining, interaction, and integration for short agent mining. The book was motivated by increasing interest and work in the agents data mining and vice versa. The interaction and integration comes about from the intrinsic challenges faced by agent technology and data mining, respectively. For instance, multi-agent systems face the problem of enhancing agent learning capability and avoiding the uncertainty of self-organization and intelligence emergence. Data mining, if integrated into agent systems, can greatly enhance the learning skills.

of agents and assist agents with predication of future states thus initiating follow up action or intervention. The data mining community is now struggling with mining distributed interactive and heterogeneous data sources. Agents can be used to manage such data sources for data access monitoring, integration and pattern merging from the infrastructure gateway message passing and pattern delivery perspectives. These two examples illustrate the potential of agent mining in handling challenges in respective communities. There is an excellent opportunity to create innovative dual agent mining interaction and integration technology tools and systems which will deliver results in one new technology. **Aircraft Design Data ...**
