

Hardware and Software: High School Midterm Study Guide

This study guide covers the key concepts of hardware and software, designed for first-year high school students preparing for their midterm exams. It includes essential definitions, examples, and explanations to help you succeed.

What is hardware?

Hardware refers to the physical components of a computer system, such as the CPU, monitor, keyboard, and mouse. These are the tangible parts that you can touch and see.

What is software?

Software refers to the set of instructions or programs that direct the hardware to perform specific tasks. Examples include operating systems, games, and productivity tools like Microsoft Word.

What are the main categories of hardware?

1. **Input Devices:** Devices that allow users to enter data (e.g., keyboard, mouse).
2. **Output Devices:** Devices that display or output data (e.g., monitors, printers).
3. **Storage Devices:** Devices that store data (e.g., hard drives, SSDs, USB drives).
4. **Processing Devices:** The CPU and GPU, which process data.

What are the two main types of software?

1. **System Software:** Manages and controls computer hardware, such as operating systems (e.g., Windows, macOS, Linux).
2. **Application Software:** Performs specific user tasks, like word processing or web browsing (e.g., Google Chrome, Microsoft Excel).

What is the difference between hardware and software?

Hardware is physical and tangible, while software is intangible and consists of code or instructions.

What does the CPU do?

The CPU (Central Processing Unit) is the brain of the computer. It processes instructions, performs calculations, and manages the flow of data in a computer.

What is primary storage?

Primary storage, also known as RAM (Random Access Memory), temporarily stores data that the CPU needs while working. It is volatile, meaning data is lost when the computer is turned off.

What is secondary storage?

Secondary storage refers to non-volatile storage that holds data permanently or semi-permanently, such as hard drives, SSDs, and USB flash drives.
