Concept Sourcebook Edward T. White, 1975 *Architectural & Const. Data* George Salinda Salvan, 2000 **Inclusion, Disability and Culture** Santoshi Halder, Lori Czop Assaf, 2017-05-08 This book provides a global and social examination of how disabilities are played out and experienced around the world. It presents auto ethnographic perspectives on disability across cultures, societies and countries by documenting individuals' personal narratives, thought processes and reflections. Chapter authors share cross cultural perspectives within and across various countries such as India, Australia, United States, Sri Lanka, United Kingdom, Croatia, Brazil, South Africa and Qatar. Adopting a self reflective stance following qualitative research methodology, the chapter authors discuss the current challenges in the field. Next, they deconstruct disability identities, explore the complexities of communication with differently abled persons, examine inclusive policies, practices and interventions, and present insights from caregivers. The book concludes with critical reflections and a look to the future of global diversity and inclusion.

Structure As Architecture Andrew Charleson, 2014-07-11 Structure as Architecture presents a comprehensive analysis of the indispensable role of structure in architecture. An exploration as well as a celebration of structure, the book draws on a series of design studies and case study examples to illustrate how structure can be employed to realize a wide range of concepts in contemporary architecture. By examining design principles that relate to both architecture and structural engineering, Andrew Charleson provides new insights into the relationship between both the technical and aesthetic aspects of architecture. Now in its second edition, the text has been extensively revised and updated throughout. Features include: A brand new chapter on hidden structure adding to the material on exposed structures. Two new chapters on using structure to realise common architectural concepts through a combination of precedents and creative design. Over 50 new case studies from across the globe. Easy to understand diagrams and a highly visual design to aid understanding and accessibility. More than two hundred case studies of contemporary buildings from countries such as the UK, the US, France, Germany, Spain, Hong Kong, Australia and Japan illustrate how a thorough integration of structure adds layers of richness and enhances the realisation of architectural design concepts.

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1977 **Introduction to Rights-based Direct Practice with Children** Murlí Desai, 2018-01-19 The Sourcebook introduces the theoretical and ideological foundation and methodological basis of Rights based Direct Practice with Children. It starts with the methodology of participatory group workshops to facilitate learning of the content. The content draws linkages among the foundation of life skills, psychosocial, sociological and critical theories of childhood and child rights, values, categories and principles with the approaches, methods and skills of direct practice with children. The book takes examples from India but makes significant contribution to training and reference material for child rights teachers, trainers, facilitators and field workers across the world, especially in the developing countries.

Making Friends (and Making Them Count) Emory A. Griffin, 1987-05-29 and Making Them Count Exploring the art of friendship

Em Griffin discusses what attracts one person to another how self concept affects relationships how people form first impressions and what ingredients make for lasting friendships **Coping+Plus** Frank M Robinson,Doe West,Dwight Woodworth Jr.,1995-03-24 Everyone can learn new or more effective coping skills and strategies to deal with times of loss crisis and disability Being aware of possible options or of how others fare in coping with difficult situations is better than groping in the dark It is hoped that the real life experiences and coping skills presented here will help others in dealing with similar issues and challenges **The Tectonics of Structural Systems** Yonca Hurol,2015-09-16 The Tectonics of Structural Systems provides an architectural approach to the theory of structural systems The book combines structural recommendations to follow during the architectural design of various structural systems and the tectonic treatment of structural recommendations in architecture Written expressly for students the book makes structures understandable and useful providing practical and useful knowledge about structures a design based approach to the subject of structures and a bridge in the gap between structures and the theory of design Good architectural examples for each structural system are given in order to demonstrate that tectonics can be achieved by applying technical knowledge about structures Over 300 illustrations visually unpack the topics being explained making the book ideal for the visual learner *Books and Pamphlets, Including Serials and Contributions to Periodicals* Library of Congress.
