With advanced materials being in the midst of a widely acknowledged revolution there is relentless pressure on scientists and engineers to be on the current edge of emerging theories and design methodologies. The 379 papers in the two part volume bring together the experience of specialists in the entire field of applications of materials science. This multidisciplinary meeting was held to bring together workers in a wide range of materials science and engineering activities who employ common analytical and experimental methods in their day to day work. The results of the meeting should be of world wide interest and should help to stimulate future research and analysis in this area.      Annual Index/abstracts of SAE Technical Papers, 1994
