 and the need for deregulation we now see growing interest in the possibility of constructive governance alongside public  
 calls for new smarter regulation Yet there is a real danger that regulatory reforms will be rooted in outdated ideas As the  
 financial crisis has shown neither traditional market failure models nor public choice theory by themselves sufficiently inform  
 or explain our current regulatory challenges Regulatory studies long neglected in an atmosphere focused on deregulatory  
 work is in critical need of new models and theories that can guide effective policy making This interdisciplinary volume  
 points the way toward the modernization of regulatory theory Its essays by leading scholars move past predominant  
 approaches integrating the latest research about the interplay between human behavior societal needs and regulatory  
 institutions The book concludes by setting out a potential research agenda for the social sciences **American Book**
