Conditional Design Workbook:

Conditional Design Workbook Luna Maurer, Edo Paulus, Jonathan Puckey, Roel Wouters, 2013 Conditional design is a design method formulated by the graphic designers Luca Maurer, Jonathan Puckey, Roel Wouters and the artist Edo Paulus in which conditions and rules of play are drawn up that invite cooperation within a regulated process towards an unpredictable design or result **Digital Design Theory** Helen Armstrong, 2016-06-28 Digital Design Theory bridges the gap between the discourse of print design and interactive experience by examining the impact of computation on the field of design. As graphic design moves from the creation of closed static objects to the development of open interactive frameworks, designers seek to understand their own rapidly shifting profession. Helen Armstrong's carefully curated introduction to groundbreaking primary texts from the 1960s to the present provides the background necessary for an understanding of digital design vocabulary and thought. Accessible essays from designers and programmers are by influential figures such as Ladislav Sutnar, Bruno Munari, Wim Crouwel, Sol LeWitt, Muriel Cooper, Zuzana Licko, Rudy VanderLans, John Maeda, Paola Antonelli, Luna Maurer, and Keetra Dean Dixon. Their topics range from graphic design's fascination with programmatic design to early strivings for an authentic digital aesthetic to the move from object based design and to experience based design. Accompanying commentary assesses the relevance of each excerpt to the working and intellectual life of designers.
