

### Task1: Curriculum of Computer Science Department – 3 marks

Your task is to create a knowledge base describing courses and their prerequisites. The graph below shows the courses and their prerequisites.

As shown in the graph, a solid directed arrow from CS15 to CS16 indicates that CS15 is a prerequisite to CS16. A dotted arrow means that ONE of the these courses is a prerequisite of the course. For example, to take CS33, you have to take either CS16 or CS18. Course names are constants, so you have to use lowercase letters (cs22,cs33, etc) in your code. More facts about the transcript are:

- CS15, CS17, CS33, CS141 and CS166 are only offered in the fall.
- CS16, CS18, CS22, CS32, CS166 are only offered in the spring.

You also have a set of **rules** as follows:

- A course is **introductory** if it's offered in the fall and has no prerequisites, or if it's offered in the spring and its prerequisite that has no prerequisites.
  - A course is **intermediate** if it is not introductory, but its prerequisites are all introductory courses.
  - A course is **upper level** if its prerequisites are not introductory courses, or if its prerequisites are CS22 and introductory.
  - Course may only be of one level; i.e., introductory courses may not also be intermediate courses, etc.
- A. Considering the fact, that fall semester is over and Sarah were able to complete 4 courses only and failed in CS33. You should now add a set of facts that students have taken some courses using the `has_taken` predicate (i.e., `has_taken(sarah, cs15)`).
- B. Then, you need to add one more rule to test the **eligibility** of a student to take a course in the spring: `can_take(Student, Course)`, true when Student is eligible to take Course (i.e., they have taken the necessary prerequisites).
