Concept And Form Volume 1 Concept And Form Volume 1:

Concept and Form, Volume 1 Peter Hallward, Knox Peden, 2012-12-12 Concept and Form is a two volume monument to the work of the philosophy journal the Cahiers pour l'Analyse 1966-69 the most ambitious and radical collective project to emerge from French structuralism. Inspired by their teachers Louis Althusser and Jacques Lacan the editors of the Cahiers sought to sever philosophy from the interpretation of given meanings or experiences focusing instead on the mechanisms that structure specific configurations of discourse from the psychological and ideological to the literary scientific and political. Adequate analysis of the operations at work in these configurations they argue helps prepare the way for their revolutionary transformation. This first volume comprises English translations of some of the most important theoretical texts published in the journal written by thinkers who would soon be counted among the most inventive and influential of their generation Alain Badiou Yves Duroux Alain Grosrichard Serge Leclaire Jacques Alain Miller Jean Claude Milner and Fran ois Regnault. The book is complemented by a second volume consisting of essays and interviews that assess the significance and legacy of the journal and by an online edition of the full set of original Cahiers texts produced by the Centre for Research in Modern European Philosophy at Kingston University London and accessible at cahiers.kingston.ac.uk

Adventures with the Theory of the Baroque and French Philosophy Nadir Lahiji, 2016-09-22 Analysing the reception of contemporary French philosophy in architecture over the last four decades Adventures with the Theory of the Baroque and French Philosophy discusses the problematic nature of importing philosophical categories into architecture Focusing particularly on the philosophical notion of the Baroque in Gilles Deleuze this study examines traditional interpretations of the concept in contemporary architecture theory throwing up specific problems such as the aestheticization of building theory and practice Identifying these and other issues Nadir Lahiji constructs a concept of the baroque in contrast to the contemporary understanding in architecture discourse Challenging the contemporary dominance of the Neo Baroque as a phenomenon related to postmodernism and late capitalism he establishes the Baroque as a name for the paradoxical unity of kitsch and high art and argues that the digital turn has enhanced the return of the Baroque in contemporary culture and architectural practice that he brands a pseudo event in the term neobaroque Lahiji's original critique expands on the misadventure of architecture with French Philosophy and explains why the category of the Baroque if it is still useful to keep in architecture criticism must be tied to the notion of Post Rationalism Within this latter notion he draws on the work of Alain Badiou to theorize a new concept of the Baroque as Event Alongside close readings of Walter Benjamin Theodor Adorno and Michel Foucault related to the criticism of the Baroque and Modernity and discussions of the work of Frank Gehry in particular this study draws on Jacque Lacan's concept of the baroque and presents the first comprehensive treatment of the psychoanalytical theory of the Baroque in the work of Lacan
