**Content** Randy Clark West, James Richard Willis, Mihai O. Marasteanu, 2013 TRB's National Cooperative Highway Research Program NCHRP Report 752 Improved Mix Design Evaluation and Materials Management Practices for Hot Mix Asphalt with High Reclaimed Asphalt Pavement Content describes proposed revisions to the American Association of State Highway and Transportation Officials AASHTO R 35 Superpave Volumetric Design for Hot Mix Asphalt and AASHTO M 323 Superpave Volumetric Mix Design to accommodate the design of asphalt mixtures with high reclaimed asphalt pavement contents

**Mix Design Practices for Warm Mix Asphalt** Ramon Francis Bonaquist, Advanced Asphalt Technologies, LLC., 2011 TRB's National Cooperative Highway Research Program NCHRP Report 691 Mix Design Practices for Warm Mix Asphalt explores a mix design method tailored to the unique material properties of warm mix asphalt technologies Warm mix asphalt WMA refers to asphalt concrete mixtures that are produced at temperatures approximately 50 F 28 C or more cooler than typically used in the production of hot mix asphalt HMA The goal of WMA is to produce mixtures with similar strength durability and performance characteristics as HMA using substantially reduced production temperatures There are important environmental and health benefits associated with reduced production temperatures including lower greenhouse gas emissions lower fuel consumption and reduced exposure of workers to asphalt fumes Lower production temperatures can also potentially improve pavement performance by reducing binder aging providing added time for mixture compaction and allowing improved compaction during cold weather paving Appendices to NCHRP Report 691 include the following Appendices A B and D are included in the printed and PDF version of the report Appendices C and E are available only online

*Climate Change, Energy, Sustainability and Pavements* Kasthurirangan Gopalakrishnan, Wynand JvdM Steyn, John Harvey, 2014-09-25 Climate change energy production and consumption and the need to improve the sustainability of all aspects of human activity are key inter related issues for which solutions must be found and implemented quickly and efficiently To be successfully implemented solutions must recognize the rapidly changing socio techno political environment and multi dimensional constraints presented by today's interconnected world As part of this global effort considerations of climate change impacts energy demands and incorporation of sustainability concepts have increasing importance in the design construction and maintenance of highway and airport pavement systems To prepare the human capacity to develop and implement these solutions many educators policy makers and practitioners have stressed the paramount importance of formally incorporating sustainability concepts in the civil engineering curriculum to educate and train future civil engineers well equipped to address our current and future sustainability challenges This book will prove a valuable resource in the

hands of researchers educators and future engineering leaders most of whom will be working in multidisciplinary environments to address a host of next generation sustainable transportation infrastructure challenges This book proposes a broad detailed overview of the actual scientific knowledge about pavements linked to climate change energy and sustainability at the international level in an original multidimensional multi effects way By the end the reader will be aware of the whole global issues to care about for various pavement technical features around the world among which the implications of modelling including data collection challenging resources saving and infrastructures services optimisation This is a complete and varied work rare in the domain Dr Agnes Jullien Research Director Director of Environmental Development Safety and Eco Design Laboratory EASE Department of Development Mobility and Environment Ifsttar Centre de Nantes Cedex France An excellent compilation of latest developments in the field of sustainable pavements The chapter topics have been carefully chosen and are very well organized with the intention of equipping the reader with the state of the art knowledge on all aspects of pavement sustainability Topics covered include pavement Life Cycle Analysis LCA pervious pavements cool pavements photocatalytic pavements energy harvesting pavements etc which will all be of significant interest to students researchers and practitioners of pavement engineering This book will no doubt serve as an excellent reference on the topic of sustainable pavements Dr Wei Hsing Huang Editor in Chief of International Journal of Pavement Research and Technology IJPRT and Professor of Civil Engineering National Central University Taiwan **Field Materials Manual**, 2017
